

MEDHUB

A Health Monitoring App

made with love by:

Rohan Kumar

Problems to be addressed:

- Senior citizens often forget to take medicines.
- Taking Medicines is often confusing, so they end up taking them at wrong times.
- Medicines need to be restocked, causing problems to the elderly.
- Losing of Prescriptions and Health Documents.

Services Offered:

- It allows youth to monitor their parents by creating elderly profiles and youth profiles.
- It allows for storage of medical documents on our encrypted cloud base.
- Medicine reminders and automatic drug order reminders and placements from the nearest pharmacy.
- Health information visual representation on graphs.
- Lifestyle tips and AI based symptoms analyser.

Project Trial

Demands:
